

PIONEER AIR SYSTEMS - DRY CONSTRUCTION AIR SERIES

Designed especially for the construction industry and other applications requiring clean dry air without the use of electricity, the DCA Series is a complete cooling, drying and filtration system run completely pneumatically.

The DCA unit is ready to connect directly to your portable compressor with these features:

Compact design	Trailer-mounted	Air-cooled aftercooler with air motor
Built-in separator	Pre-filter and drain	Manual drain
Dual sight glasses	Pressure relief valve	Factory filled desiccant

In, out and drain connections conveniently located on one side at the same height

Model	Capacity-SCFM			In/Out In.NPT	Filter Model	Dimensions			Approx Wt. Lbs.
	@100psig	@125psig	@150psig			L	W	H
